Killer Sudoku

by Wei-Hwa Huang
for Silicon Valley Puzzle Fest 2011

Rules are the same as standard Sudoku, with the added constraint that some "mini-regions" are marked by dotted lines. The sum of the numbers in each mini-region is given.

If you have trouble getting started, there is a hint at the bottom of the page in a simple code. To decode the hint, find the next letter for each letter in code.

```
